

Dear FCC,  
Please allow XM radio to continue its broadcasting services to the American public including the local traffic and weather for selected cities across America. These services offer the American listeners a choice, a choice for which we the subscribers gladly pay a fee.

The choice is between radio that is music, news, weather, traffic and information oriented or radio that is a small amount of relevant content and numerous ads clogging the airwaves. Most of us selected XM radio to get away from the noise and clutter of DJ's and commercials bombarding us every day. XM offers an alternative that we pay for to listen to a variety of music commercial free.

Please stop the NAB and their big bucks backers from allowing Americans to exercise their right of choice. Please disallow the NAB 04-160 petition and allow the airwaves to be available for commercial free music, news, traffic and weather for the benefit of the American listener.

Thank-you,

Frank Westover
